Ref: PR Docket 92-235

To Whom it May Concern:

I am corresponding concerning PR Docket 92-235. I am opposed to the "Refarming" of the frequency spectrum. This would place a totally unmanageable condition on every aspect of the economy. In particular I am concerned with the volunteer emergency service. This type of service operates with minimum funding and would not be in a position in the near future to purchase a complete communications system.

I further understand the technical issues would prevent tone and voice paging as we use it today. This is the primary way for the volunteer emergency service to alert their membership of an emergency. In El Paso County, Colorado there are elevations ranging from 5000 feet to 14,000 feet with fire loading and medical emergencies covering this entire spectrum that require response of emergency services. With the proposed changes the absence of medium
